---

I am a motivated and hardworking full stack developer that loves working with design and frontend frameworks. User-centric development is my passion due to my previous work experience in sales and customer service, where I delivered solutions to resolve customer concerns by communicating effectively with others. I am excited about the opportunity to be a part of a team with a culture of collaboration and excellence.

TECHNICAL & INTERPERSONAL SKILLS

Languages: JavaScript, HTML, CSS, Python
Libraries and Frameworks: Express.js, Django, React, Bootstrap, Tailwind CSS
Databases and other: MongoDB, PostgreSQL, RESTful APIs, GitHub, Heroku, Netlify
Interpersonal skills: Communication and Listening skills, Teamwork, Conflict-resolution

TECHNICAL PROJECTS

Places - GitHub Frontend | GitHub Backend | App - React | Express | PostgreSQL
Places is an app where users can create property listings and manage these listings
- Designed a dynamic search bar that filters results
- Implemented a PostgreSQL database for maintaining data in the backend server
- Created an engaging and responsive user interface with React

Pens - GitHub | App - JavaScript | Express | MongoDB
Pens is an app where users can create, update, and delete diary-like entries
- RESTful routes and app functionality using Express.js, mongoDB and Mongoose
- CSS and animations used to create a soft colour palette theme

Good Start - GitHub | App - Javascript | HTML | CSS
Good Start helps busy users stop and start their day with an inspiring quote and meditative colour animation
- Built a function to retrieve API data to display inspirational quotes
- Created a glowing, animated background with CSS
